25X1

1. The institute for ship steering apparatus and navigation, which, it was previously reported, was to be constructed in Stralsund, is to be built in Rostock instead. The construction is to be completed in 1955. The name of the institute is to be "Versuchs- und Pruefungsstelle fuer Schiffsfuehrungsgeraete und nautische Geraete" (Experimental and Testing Installation for Ship's Steering and Navigational Apparatus). As of June 1955, ~~the amount of~~ two million DME had been set aside for buildings and equipment.
2. The institute is to be subordinate to DAMW (Deutsches Amt fuer ~~Material- und Warenpruefung~~ - German Office for Testing Materials and Commodities), since that office is responsible for all testing activities in East Germany. In the past, the testing of navigational equipment has been done by the enterprises engaged in the manufacture of the equipment or by foreign institutes. DAMW will also be responsible for the supervision of all calibration work (Eichung) of measuring apparatus and weights done by the institute.
3. Merchant Marine Captain (Handelsschiffkapitaen) Pieper (fnu), who in the past has been responsible for the testing of navigational equipment in East Germany, will be placed in charge of the institute by DAMW.
4. VEB Regler- und Geraetewerk (RGW), Berlin-Teltow, produces a large amount of equipment for ship's steering (automatic telegraphs and other equipment for commanders) and navigation (compasses and gyrocompasses). The equipment produced by this enterprise is not as good technically as that produced in the West, allegedly because of the shortage of suitable materials, especially salt water resistant (seewasserfest) light metals (Leichtmetall).
